

Someone To Say Hi To - 1/1

Interprété par Ks Choice.

Look at you how well you've done so far
Look at where you're standing, who you are
And all our moments, good and bad forever in my head
Wish we could go back just once and laugh at things we said
It's been wonderful and crazy knowing you

And I hope that I can always see a teenage girl in you
And I know that you'll be fine but I'll be there every time
You need someone to say hi to late at night

Remember how I told you I was scared
You'd end up with some jerk who doesn't even know you're there
Deep down I just knew that you would find someone who's real
Who doesn't claim to know exactly everything you feel

It's been wonderful and crazy knowing you
And I hope that I can always see a teenage girl in you
and I know that you'll be fine but I'll be there every time
You need someone to say hi to late at night

Sometimes when I think of us I'm sad
And it's not-knowing anything of what could lie ahead
And mostly now I'm grateful that you're where you want to be
Not quite here and not quite there but somewhere in between

It's been wonderful and crazy knowing you
And I hope that I can always see a teenage girl in you
And I know that you'll be fine but I'll be there every time
You need someone to complain to late at night
