

# Superstar - 1/1

**Interprété par Sheryl Crow.**

Let's all go downtown  
I got friends doing nothing but hanging around  
Well I feel like there's something I could be missing

You know you look alright  
You got cheap shoes, a Malibu and big public fights  
Well there's no one else I would rather be kissing

Baby when you start to bleed, you look so sweet  
Everybody's watching you 'cause everybody wants to be

Little superstar, well baby that's what you are  
Little superstar, oh honey that's what you are

I got a backstage line  
I call you up been watching you for quite some time  
I beat around the streets like Bandini looking for Camilla

I'll be satin and speed  
If you and I are still alive we'll get off these streets  
Well there was a time I would've hung around just to be seen

Hey man, it's a shame when you start to fade  
Diamond rings and sparkily things won't make your shine stay

My little superstar, oh baby that's what you are  
My little superstar, oh honey you break my heart  
My little superstar, oh honey you know you are  
My little superstar, oh honey you break my heart
