

## Live for eral - 1/1

**Interprété par Ks Choice.**

Life has always been a pretty song, and pretty loud,  
You're so beautiful,  
Why's it fading out?  
I don't want to live forever  
But as long as I do, I'd love to live  
For real.  
Now the boy who dried your tears is  
Crying all the time  
Now the joy I've had for years  
Has left me for a while  
And I don't want to live forever  
But as long as I do, I'd love to live  
For real.

With you I might get there  
With you I might start to feel  
With you I will get there  
With you I will live for real

I will breathe the air I'll dance.  
And you will wonder why  
Its because you made me see this  
Chance was moving by  
Cause I'm not going to live forever  
But as long as I do, I'd love to live  
For real.

With you I might get there.  
With you I might start to feel.  
With you I will get there.  
With you I will live for real.

When a cloud becomes my head  
Play your music loud instead  
And we'll dance until  
The both of us are dead.

With you I might get there.  
With you I might start to feel.  
With you I will get there.  
With you I will live for real.

With you I might get there.  
With you I might start to feel.  
With you I will get there.  
With you I will live for real.  
With you I will live for real.
