

Without You - 1/1

Interprété par Busted.

Without you

The way you always made me look at you
With all the simple things you said
The way so many things surrounded you
And all the tears it seemed to make

And now I'm falling
There's nothing left to say
And I can't break free
Not from in there

I can't breath without you
I can't breath without you
I can't breath without you
Without you, without you, without you

The way I thought that I'd never leave this place
The way you waited seemed so real
Cause you had faith and you had empathy
And all I needed was this

And now I'm falling
Got nothing left to say
And I can't break free
Not from in there

I can't breath without you
I can't breath without you
I can't breath without you
Without you, without you, without you

How can I let you leave this way?
Without you I'm not at all
And I see things now, all these memories
Just to see you again
