

# You - 1/1

**Interprété par Ten Sharp.**

It's alright with me  
As long as you are by my side  
Talk or just say nothing  
I don't mind your looks never lie  
I was always on the run, finding out  
What I was looking for and  
I was always insecure, just until I found

Words often don't come easy  
I never loved to show you the inside of me  
You were always patient  
Dragging out what I tried to hide  
I was always on the run, finding out  
What I was looking for and  
I was always insecure, just until I found

You, you were always on my mind  
You, you're the one I'm living for  
You, you're my everlasting fire  
You're my always shining star

Nights always are good friends  
A glass of wine and the lights down low  
You lying beside me  
Me full of love and filled with hope
