What comes around - 1/2

Interprété par Ill Niño.

I hate you. I hate you - shut up...

You think that I'm the one to blame Everything I lose is just a piece of what there is to gain You think it's cool and all is fine Now is the day when you pay, this is my time I feel for you nothing but pain I am what you will be, you are dying in me I love you, I hate you, I miss you...

You're always thinking you're so perfect Those thoughts drove me away from home But if you put me through your tests Then I will fade

I have nothing to say But I feel like my mouth is wide open Everything that is real Comes around Comes around Comes around...

Shut up...

Your stupid face just makes me sick I see you changing every day To fit into the newest clique I know you, but everything you do Is just a part of you, you'll never see the truth I hate the way you make me feel I hate the way you think you're real Your one voice it destroys my one choice

You're always thinking you're so perfect Those thoughts drove me away from home But if you put me through your tests Then I will fade

I have nothing to say But I feel like my mouth is wide open Everything that is real Comes around Comes around...

Tu vida es mia Your fear is living here in me

What comes around - 2/2

Es que no entiendo come en la vida puedes hacer La paz entre nostros cuando no vas a decir Y la gratitude que tu nunca vas a ver Has now turned to hate

I have nothing to say But I feel like my mouth is wide open Everything that is real Comes around Comes around...

Shut up !
