

I had a dream... - 1/1

Interprété par In Memoriam.

Last night I had a dream
Where European were free to think
It seemed to me so real that when I woke-up
I found again the will to fight

I hope for my children and the children of my children
Yes I hope for the future that my vision become real.
Hope will save us from a new kind of desaster
Hope lies within you and me, we must find it faster!

In my dream there was no pollution, nor corruption,
Just perfection and peace of mind.
Open your eyes and dream with me, we can make it happen.

(Chorus)

A new order, a new order will arrive.
No more disorder this time we will survive.
