Everytime I see you with that guy
It blows my mind
How someone like that could get a girl so fly
I could see it if he's only treat you right
But he don't so let's not trip on him tonight

BRIDGE

I don't really need the time to think about it
All I know is you're here for me and that's it
In a minute you're gonna be right here instead of
There with him
I can see that your body's reading my mind
Every move that you make is dropping on time
Baby come on and dance with me
And let the music play

CHORUS

Turn the volume up
Listen baby girl I like your stuff
Come up close to me
I see how we're gonna get some privacy
Get on up
Listen baby girl you are the one
Think it's time for us to leave
Can we get some privacy ?

I don't know why
And what it is you're trying to deny
'Cause when I look at you I see it in your eyes
The way we fit together you and me
And you would know if we could get some privacy

BRIDGE

I don't really need the time to think about it
All I know is you're here for me and that's it
In a minute you're gonna be right here instead of
There with him
I can see that your body's reading my mind
Every move that you make is dropping on time

And let the music play

CHORUS

OUTRO

I wouldn't go with him if I were you
'Cause anything you need I got it

I'm not just anybody
I'm gonna make your wildest dreams come true
And I don't wanna play with your emotions
Your love is my devotion now
Right now, right now
