

We are the future - 1/2

Interprété par Stratovarius.

Album : Dreamspace (1994)

Paroles et Musique : Timo Tolkki

What is wrong with a man
Destroying the land
Our planet is full of waste
Sheltering ozone layer is no more a shield
The temperature is rising up

Now it's time to stop this madness
Preventing increasing sadness
Let's put end to all this while we can

Man against another man
How somebody can
Judge by colour of the skin
See the signs make up your mind
Now it's time for the change
It is not too late

Now it's time to stop this madness
Preventing increasing sadness
Let's put end to all this while we can

Save us, we are the future
Lead us into the better world now
Show us the way to reality
No more injustice or cruelty

Save us, we are the future
Lead us into the better world now
Show us the way to reality
Injustice is all gone

Fast, fast stop this course now
Last, last or we won't last
Past, stop living in the past or you will die
End, end, end of our time
Time our precious time
Crime, crime against mankind we have to pay

In the course of mad destruction
There'll be no coming back
The nuclear end is in sight
Soon there will be no one to fight with
Take a look into the sky

We are the future - 2/2

It may be your last time
The complete end is in sight
Soon there will be no one to with

Save us, we are the future
Lead us into the better world now
Show us the way to reality
No more injustice or cruelty

Save us, we are the future
Lead us into the better world now
Show us the way to reality
Injustice is all gone
