

Can't get over you - 1/1

Interprété par Groove Coverage.

There's an everlasting storm blowing through the night
I feel love, I feel hate right by my side ...
Tears like rain falling down, don't know what to do
I remember those days, can't get over you

You decided to leave and told me nothing but lies
Got no reason to live, I need you by my side
There are so many things, you didn't come up to
I'm surrounded by pain, can't get over you

So much time passing by, since you went away
I felt sun, touched the spring and saw autumns gray
Tears like rain falling down, don't know what to do
I remember those days, can't get over you

So I'm still searching for a certain place to hide
I feel love, I feel hate, there's no end in sight
Most of all I can't wait, to come back to you
I'm surrounded by pain, can't get over you
