

Black - 1/2

Interprété par Tokio Hotel.

The world has broken down
Every stone's been turned around
We feel no fear at all
Not at all

We don't know what's to come
Our beginning had already begun
And now we have to run
Come on

The last look back is black
The night turns dark ahead
When there's no turning back
We're glad
So glad
No turning back
No turning back

Where have you gone ?
You made us feel so strong
You lost us and now we are
Alone

It's dark despite the light
Tomorrow's not in sight
And we were born to go
On and on

The last look back is black
The night turns dark ahead
When there's no turning back
We're glad
So glad
No turning back
No turning back

Let us run and don't look back
We leave behind a burning track
Let us run and don't look back
We leave behind a burning track
Come on
Come on

The last look back is black
The night turns dark ahead
When there's no turning back
We're glad

Black - 2/2

So glad

The last looks back is black

The night turns dark ahead

There's no turning back

We're glad

So glad

No turning back

No turning back
