

If i should die (avec belly) - 1/2

Interprété par Massari.

[Belly:] If I should die... before I wake... I pray the lord... my soul to take

[Massari:] Weary of rise and weary of rest
But no one will save you now you'll save yourself someday
Don't cross the line just walk away
Cause this is Massari baby and I am here to stay

Should all hell break loose and come to
You're lost and to tell you the truth's to forgive and forget
Time is tickin a tickin away
Look in the mirror and say its time that I change my ways
But if you're feeling lonely and sorrow
The world brings nothing but ugly tomorrows
Just keep lickin a slickin away
At you and your brothers and say "Hey playa where's my money?"

If I should die before I wake
I praise the lord be for my soul to take
And if I should die before I wake
I praise the lord be for my soul to take

[Massari:] Looking for these losers that bag your pay checks
If ever you in need they'll give you a rain check
You keep calling us calling away
Someone putting your life to save but no one's coming by today
Locked up up in a world with crazy confusion's wondering if dope is just bringing illusions
You keep thinking just thinking away
"How could I turn out this way, I got the broken heart to tell"

If I should die before I wake
I praise the lord be for my soul to take
And if I should die before I wake
I praise the lord be for my soul to take

[Belly:] If I should die before I wake I will probably be known
You listen and understand but don't follow me though
Today you could be rich but tomorrow you're broke
Tokin' the weed for stress the press swallowin smoke
We all got our bad habits
We have beef and had static the streets had frantics
Becoming some crack addicts
They underground by 72 inches abuse and overuse of roads up and builds per spoons and syringes
It's senseless because the human's life is priceless
It doesn't matter how rich you are, if you ended up lifeless
That's why we can't believe the snakes claiming they righteous
This is an urgent sermon working against the crisis
My days are nightmares and my nights are bright

If i should die (avec belly) - 2/2

They came with night sticks so we fight for life
I don't like your type wonderer in what I did
to see the things I see when I close my eye lids

[Massari:] Said feeling for the truth you feel for these feelings
And make your body feel like its finally healing
You keep shootin a shootin away
Call somebody to your pain, is anything gonna stop the pain ?
And now you're limp in on the street and your soul is just dyin
Your mama's worried sick and she's moanin and cryin
You keep runnin just runnin I'm sayin runnin the opposite way lookin for a better tomorrow
C'mon face the truth you know where you're rowin
There aint no use for losers and dope heads
Life is slippin a slippin away right between your fingers
I'm sayin "Yeah playa think I'm funny"
If you only knew what's true and the faithful
Make it through and this world is so hateful
You be prayin just prayin away
Praising this I think I think it's time that I died today
So if your needs turns on and you've lost your way
And in your heart you feel you won't see another day
Don't hold back don't be afraid
Bring yourself together let Austin lead the way

If I should die before I wake
I praise the lord be for my soul to take
And if I should die before I wake
I praise the lord be for my soul to take
