

## Like i never loved you at all - 1/2

Interprété par Take That.

Where, where are the stars  
The ones that we used to call ours  
Can't imagine it now  
We used to laugh till we fell down  
Secrets we have now in the past  
From something to nothing

Tell me  
How did we lose our way  
It's hard to remember  
All that we shared  
Now we both got separate lives  
From lovers to strangers  
Now alone  
There's no one catching my fall  
No one to hear my call  
It's like I never loved you at all

Now you're so far away  
And I see our star is fading  
One too many times  
Guess it just got tired of waiting round  
The nights that we thought  
That these walls could talk  
From something to nothing

Tell me  
How did we lose our way  
It's hard to remember  
All that we shared  
Now we both got separate lives  
From lovers to strangers  
Now alone  
There's no one catching my fall  
No one to hear my call  
It's like I never loved you

So now does he give you love  
Oh, is it only me now  
Who's thinking of  
What we had  
And what we were  
Or did you ever care  
Baby, was I ever there

How did we lose our way  
It's hard to remember
