

## Hey - 1/2

**Interprété par Red Hot Chili Peppers.**

Wan't somebody come along  
And teach me how to keep it alive  
To survive

Come along and show me something  
That I never knew in your eyes  
Take away the tourniquet

I used to be so full of my confidence  
I used to know just what I wanted and just where go  
More than ever I could use a coincidence

Hey awe yeah how long  
I guess I oughta walk away  
Hey awe yeah so long  
Watcha' gonna do today

I don't want to have to but I will  
If that's what I am supposed to do  
We don't wanna set up for the kill  
But that's I am about to do

Later on I'll cut you off  
When you're screaming into the phone  
Hard to own

Anyway I want to let you know  
That everything is on hold  
What you gonna do to me

You used to be so warm and affectionate  
All the little things I used to hear my fairy say  
But now you're quick to get into your regret  
Take a fall and now you got to give it all away

Hay, what would you say if I stay  
Stay for a while I may  
Say it again and I'll come around  
But not for the last time  
Hey, what would you say if I change  
Change everything but my name  
Play it again and I'll come around, come around  
But not for the last time, not for the last time

You used to be so warm and affectionate  
I used to know just I wanted and just where to go  
And know you're quick to get into your regret

## Hey - 2/2

But now I walk alone and talk about it, when I know
