

An Apple A Day - 1/1

Interprété par Aqua.

Welcome to the clichés welcome to the part
Where we wanna finish - what we can't start come and get me

Just don't miss the water - until the well is dry
You got to learn walking - after you can fly come and get us

What goes in will get out - what goes up comes right down
We go up - we go up - we go up

You know an apple a day won't keep the doctor away
Were never taught what we teach and won't practice what we preach
You know an apple a day won't keep my troubles away
Once bitten bye, bye
All the clichés is here to die

Just eat all the people - on your way up
Cause they'll eat your heart out - on the way down come and get me

Start what you can't finish stick to what you can't
Life is here to help us - get things out of hand - come and get us

What goes in will get out - what goes up comes right down
We go up - we go up - we go up

You know an apple a day won't keep the doctor away
Were never taught what we teach and won't practice what we preach
You know an apple a day won't keep my troubles away
Once bitten bye, bye
All the clichés is here to die

Cause you are what you eating don't stick to what's true
You are what you eating - let it come as it came

We are what we are what's build up will fall
Do what you want and be happy be happy be happy

You know an apple a day won't keep the doctor away
Were never taught what we teach and won't practice what we preach
You know an apple a day won't keep my troubles away
Once bitten bye, bye
All the clichés is here to die

Cause you are what you eating don't stick to what's true
You are what you eating - let it come as it came
