**Interprété par Machine Head.**

Electricity is pulsing  
through our veins a charge  
is racing  
A chain reaction through  
the four of us,  
to you, will make  
the transformers begin  
converting into overdrive

Power surge now  
exploding through  
Energy, filling the ominous  
void within you  
No need to live your life in  
that gap  
Got what you need right  
here on lightning tap, so

Charge me, charge you  
charge us, charge through  
Amplify, terrify  
supercharger electrifies

Getting under skin, we're  
like a rash  
Spreading over your body  
we are the itch you  
scratch  
That doesn't seem to go  
away  
Protons, neutrons, electrons  
synchronizing into one

In sheer power all will  
pale  
heaviness off the Richter  
scale  
Forever crushing the  
competition in their tracks  
100,000 Volts we blast, so

Charge me, charge you  
charge us, charge through  
Amplify, terrify  
supercharger electrifies

Your - little sticks of
