

Thanks For Nothing - 1/1

Interprété par Sum 41.

I'll never take part in the growing population
Or waste my time with further education
Forget what we know it's just a big show what they want to control
So jaded frustrated, it's all so complicated
Fashion no passion surrounds me

All I know is I've heard this all before
Reality 's a bore
You ask me to believe in something fake
Well I can't bring myself to do what you want me to
This is who we are and nothing's going to change
Nothing's going to change

I won't take part in businessman illusion
I'll take my chances in the real world confusion
Don't blame us who do we trust when they're so dishonest
No patience this nation's obsessed with exploitation
Lying denying surrounds me

All I know is I've heard this all before
Reality's a bore
You ask me to believe in something fake
Well I can't bring myself to do what you want me to
This is who we are and nothing's going to change

Don't think you can ignore us
Don't tell me that we're to blame
Don't pick our futur for us or act like we're the same

All I know is I've heard this all before
Reality's a bore
You ask me to believe in something fake
Well I can't bring myself to do what you want me to
This is who we are and nothing's going to change

(Thanks for nothing) Reality 's a bore
(Thanks for nothing) It'll never be the same
(Thanks for nothing) And nothing's gonna change
