

# Violence Fetish - 1/1

**Interprété par Disturbed.**

Bring the violence  
It's significant  
To the life  
If you've ever known anyone  
Bring the violence  
It's significant  
To the life, can you feel it?

How do you sleep  
When you live with your lies  
Out of your mouth  
Up from your mind  
That kind of thinking starts a chain reaction  
You are a time bomb ticking away  
You need to release

What your feeling inside  
Let out the beast  
That your trying to hide  
Step right up and be a part of the action  
Get your game face on because it's time to play

You're pushing and fighting your way  
You're ripping it up

How do you live  
Without playing the game  
Sit on the side  
And expect to keep sane  
Step right up and be part of the action  
Come get a pice of it before it's too late  
Take a look around  
You can't deny what you see  
We're living in a violent society  
Well my brother let me show you a better way  
Now get your game face on because it's time to play

You're pushing and fighting your way  
You're ripping it up

So tell me what am I suppose to be  
Another goddamn drone  
Tell me what am I suppose to be  
Should I leave it on the inside?  
Should I get ready to play?  
You're pushing and fighting your way  
You're ripping it up
