

That same song - 1/1

Interprété par Beach Boys.

Well back in time with just a rhythm and rhyme
Gregorian chants were a real big thing
They took that chant and added harmony
It was a different sound But had the same meaning

I know (I know) I know (I know)
It took us a long while
To go (to go) to go (to go)
And find us a rock style
I know (I know) I know (I know)
That we can take it one more mile because

We're singing that same song
We're still singing that same song
We're singing that same song
That same song, That same song

The rock of ages Built that rockin' sound
'Til more and more people start to come around
They worshipped in church And built that great big choir
It grew and it grew Until it spread like fire

I know (I know) I know (I know)
It took us a long while
To go (to go) to go (to go)
And find us a rock style
I know (I know) I know (I know)
That we can take it one more mile because
We're singing that same song
We're still singing that same song
We're singing that same song
That same song That same song

Same song Oh yeah
Same song Oh yeah
Same song that same song

Same song Oh yeah
Same song Oh yeah
Same song that same song
