

Little light of love - 1/1

Interprété par Le cinquième élément.

Little light of love
From a little light of love
I was born and in my cry, my cry
Was a little light of love
For the honouring of life
And the Pharos of my soul
Is this light of love
Precious little light of love
As a candle burning on

In the breezy shades of night
I keep up my faith and underset my hope
To call on a realm of light
A treasure

Your shimmer
In the middle of a shady desert
Brings on a field of light
In a light of love
Fairy light of love
Only one

Religion
Will lead us to the love we aim for
Over the dark illusions
Of the warring nations
A wind of anger leads the power

The destruction glorifier
And when the war is nearly over
How come the leaders are held in high honours
Would you die for their lie

For a greedy hunting cry
Rely on your light
On your inner loving power
A little light as sole religion

We will lead a light of love
A little light of love and freedom
Just a little light of love
A little light as sole religion
Take this little light of love
A little light of love and freedom
Take me
