

Live for eral - 1/1

Interprété par Ks Choice.

Life has always been a pretty song, and pretty loud,
You're so beautiful,
Why's it fading out?
I don't want to live forever
But as long as I do, I'd love to live
For real.
Now the boy who dried your tears is
Crying all the time
Now the joy I've had for years
Has left me for a while
And I don't want to live forever
But as long as I do, I'd love to live
For real.

With you I might get there
With you I might start to feel
With you I will get there
With you I will live for real

I will breathe the air I'll dance.
And you will wonder why
Its because you made me see this
Chance was moving by
Cause I'm not going to live forever
But as long as I do, I'd love to live
For real.

With you I might get there.
With you I might start to feel.
With you I will get there.
With you I will live for real.

When a cloud becomes my head
Play your music loud instead
And we'll dance until
The both of us are dead.

With you I might get there.
With you I might start to feel.
With you I will get there.
With you I will live for real.

With you I might get there.
With you I might start to feel.
With you I will get there.
With you I will live for real.
With you I will live for real.
