

## Start The Fire - 1/2

**Interprété par No Doubt.**

Go on and baby get the lighter  
We're gonna start the fire

The army of words in me  
Silent the soldier weeps  
Lying here back to back  
Waiting for you to react

And sometimes all I need is a good push  
Roll over and whisper some goodness  
Go on baby you be the hero  
Now can we go back to zero?

Go on and get the lighter  
We're gonna need some fire  
Let's get a little higher  
The battlefield is tired

Nevermind all  
All that  
Go on and baby get the lighter  
We're gonna start the fire

Just come here and cuddle up  
I feel a little rough  
I missed you in my sleep  
Are you still mad at me?

The moon must have mended my bad mood  
Come kiss me the way you meant to  
Last night I was just playing  
Let's put it all away and ...

Go on and get the ligher  
We're gonna need some fire  
Let's get a little higher  
The battlefield is tired

Nevermind all  
All that  
Go on and baby get the ligher  
We're gonna start the fire  
Go on and baby get the ligher  
We're gonna start the fire  
Go on and baby get the ligher  
We're gonna start the fire  
Start the fire

## Start The Fire - 2/2

Climb in and love me  
Climb in and love me

Had quite a heavy night  
So delicate our love and pride  
The most stubborn girl around  
You really know how to bring me down

One more famous night to remember  
Let's laugh at my silly temper  
Now let's burn the morning sweetly  
Get over here now and complete me

Go on and get the lighter  
We're gonna need some fire  
Let's get a little higher  
The battlefield is tired

Nevermind all  
All that  
Go on and baby get the lighter  
We're gonna start the fire  
Go on and baby get the lighter  
We're gonna start the fire  
Go on and baby get the lighter  
We're gonna start the fire  
Go on and baby get the lighter  
We're gonna start the fire
