

## Who you gonna believe - 1/2

**Interprété par Cher.**

I remember every word you said  
We can't go on this way  
Last night, you had me going out of my head  
Should I go or stay?

But I've given you everything  
That one woman could give a man  
So when you gonna recognize and realize  
Just what we had, now tell me

Who you gonna believe, her or me?  
What's it gonna be, Who you gonna believe?  
Before your heart shatters, love is all that matters

You put me through  
That lover's game over and over  
Someday someone's gonna  
Put you through the same  
Lover to lover

I hope you don't find out too late  
I hope you never have to feel the pain  
'Cause if you lose  
The love you took for granted  
That you could never appreciate

Who you gonna believe, her or me?  
Who's it gonna be, who you gonna believe?  
Before you make up your mind  
You better take some time

What about me, don't you think  
I need a man here standing by my side  
And what about you, you need a woman  
To hold you through those cold and lonely nights  
Oh, what about us we belong together  
Forever and ever, oh I'll be there  
If you should ever need me

Oh, I know everything will work  
Out fine, just believe it  
Oh, I know cause we've been through  
This a million times, keep on believing

Well I hope you don't find out too late  
Hope you never have to feel the pain  
'Cause if you lose the love you took for granted

## Who you gonna believe - 2/2

That you could never appreciate, after all this time

Who you gonna believe, her or me?

Who's it gonna be, who you gonna believe?

Who are you fooling, well you're not fooling me, no

Who you gonna believe, you can risk it all

With someone else's world wondering if it's love

Baby oh baby, you should know by now

You can believe in me, believe in me
