

I've got everything you need - 1/1

Interprété par Madison Avenue.

I've been caught 'round here now for quite some time
And I think I've got you figured out
That you don't look at me
how I look at you
You make it so hard for my love to get through
And I just know I'll make you happy
If only you'd only let me in
You never really know unless you try
I could be the girl of your dreams
I strongly suggest you don't let me pass you by

It's a lesson in simplicity
And I'll spell it out specifically
The rest is up to you
And it seriously bothers me
That you may just not ever see
The way I feel about you

CHORUS :

I've got everything you need
And I want you to be with me
And this is not some crazy fantasy
I've got everything you need, yeah
Oh woh ho woh

Take me for a ride in your big fancy car
I want to see how fast you can go
Well, drop the roof and we'll find the coast
And we won't stop driving till the sun sinks low
And we can find a little place that serves a chilled white wine
Somewhere where we can be alone
And you can feel free to impress me
And we can play until it's time to go

It's a lesson in simplicity
And I'll spell it out specifically
And we can play until it's time to go
It's a lesson in simplicity
And I'll spell it out specifically
The rest is up to you

And it seriously bothers me
That you may just never see
The way that I feel about you

CHORUS
