

# Get it together - 1/1

**Interprété par Seal.**

Now's the time for stepping out of place  
Get up on your feet and give account of your faith  
Pray to God or something or whatever you do  
What I see can make me stop and stare  
But who am I to judge the color of your hair  
Surely all you're feeling much the same as I do

We got to keep this world together, got to keep it moving straight  
Love like we need forever, so that people can relate  
If you're rolling to your left, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might  
Yeah, yeah

[We gotta do something, we gotta do something, we gotta do something]  
Thinking of the troubles of today is it easier to put that gun away  
Or is it difficult to stop the world to show you care  
Everything, everyone we know is beautiful  
Surely you will be the guide in light to see us all  
Maybe we can be the vision of a perfect man's dream

We got to keep this world together, got to keep it moving straight

Love like we need forever, so that people can relate  
If you're rolling to your left, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might

[I have something, do you have something 'cause I have something for you]  
[I have something, do you have something 'cause I have something for you]  
[I have something, do you have something 'cause I have something for you]  
[I have something for you]

We got to keep this world together, got to keep it moving straight  
Love like we need forever, so that people can relate  
If you're rolling to your left, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might

We got to keep this world together, got to keep it moving straight  
Love like we need forever, so that people can relate  
If you're rolling to your left, don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might
