

One more moment - 1/2

Interprété par Julie Masse.

One more moment with you

One more moment with you
Sweet precious time
Not so far away
One more moment with you
A thousand dreams to cast one single light

Every day I feel I'm losing ground
My wind in fire chasing midnight sun
With every season I will find a chance
To tell you darling how

With one more look in your eyes
The darkest skies suddenly disappear
With one more touch of your hand
My trembling heart will stop this yearning
Give me

One more moment with
One more moment with you
All the air that I breathe
For just one more moment with
One more moment with you
Will lead me back my love to you again

If it could only follow the path of your heart
In the church of my tears and redemption I start
Searching for faith that we lost
With every candle burning
I'm closer to your heart
Baby, baby

music

We are lovers who can calm the waves
We are lovers who can storm the seas
Like kindred spirits for eternity
This truth will not desert me
Give me

One more moment with
One more moment with you
All the air that I breathe
For just one more moment with
One more moment with you
Everything I believe

One more moment - 2/2

Baby one more moment with
One more moment with you
Under the stars so free
Give me one more moment with you
As the river runs through
Will lead me back my love to you again

music

One more moment with you
Just give me one more moment with you
