**Interprété par Stratovarius.**

Album : Fright Night (1989)

Musique : Timo Tolkki

Paroles : Timo Tolkki / Tuomo Lassila

Saw it in a dream  
The day that changed our history  
I still can hear the screams  
Swear it was no mystery  
In the heat of blast  
Houses fell down into the ground  
This happened so fast  
Mankind disappeared without sound

Now the world lives in shadow of atomic fear  
Can we win the fight for peace or will we disappear?  
Future shock  
Future shock

Saw it on the screen  
The day that changed our lives and history  
There goes our dreams  
Nuked into the sky don't know why  
In the heat of blast  
Watch the beauty of the mushroom cast  
It won't take long  
You won't live till the end of this song

Now the world lives in shadow of nuclear fear  
Can we win the fight for peace or will we disappear?  
Future shock  
Future shock
