

## Fright night - 1/2

**Interprété par Stratovarius.**

Album : Fright Night (1989)

Musique : Timo Tolkki

Paroles : Timo Tolkki / Tuomo Lassila

Feel the night, conceal your fright  
It came from your right  
Look what you found lying on the ground  
Shiny ball you don't know anything at all

Look through yourself there's a mystery full of you  
Always condemn though you never understand  
Why you resist never knew how to fight  
Touch the light

It's fright night  
It's fright night

In the dark the shining spark  
Follow this mystery ball  
But don't look back there's force of evil so black  
Ready to take you away

Look through yourself there's a mystery full of you  
Always condemn though you never understand  
Why you resist never knew how to fight  
Touch the light

It's fright night  
It's fright night

Look around, is this the end you see?  
Wrapped inside the pain and misery  
Is it true when you say that you never would give up?  
Memories fill my mind, I can see childhood again

Look I've found my old toys  
They bring memories in my head  
And now we are big boys  
And that feeling is dead and it's gone

Glimpse of the childhood appears to me so clear  
Tales from the Sherwood they fade away, disappear  
Where am I going, I can't see solution  
I'm here alone in the heart of the darkest night

It's fright night
