

Forces of nature - 1/2

Interprété par Backstreet Boys.

Opposites attract, chemicals react
When I look at you
Dazzles me the rain, fires fear the flames
You can't deny what's true

I can't help the way I feel
(Cuz you got me, yeah)
All these elements are real
They come from deep within me

I would move heaven and earth for this fire
For this ocean I'll fight for you
Let this emotion on wind takes us higher
Where there's nothing we can do

I love you
Yes, I love you
This power is greater
Than the forces of nature

We don't have no walls
The beauty of it all
Is waiting in your eyes
Breathing on my skin
Just let me take it in
Under an open sky

I can't help the way I feel
(Cuz you got me, yeah)
All these elements are real
They come from deep within me

I would move heaven and earth for this fire
For this ocean I'll fight for you
Let this emotion on wind takes us higher
Where there's nothing we can do

I love you
Yes, I love you
This power is greater
Than the forces of nature

Nothing is greater than the energy I get from loving you
Sooner or later
It'll take us to forever

I would move heaven and earth for this fire

Forces of nature - 2/2

For this ocean I'll fight for you
Let this emotion on wind takes us higher
Where there's nothing we can do

I would move heaven and earth for this fire
For this ocean I'll fight for you
Let this emotion on wind takes us higher
Where there's nothing we can do

I love you
Yes, I love you
This power is greater
Than the forces of nature
