

## Good doctor - 1/3

**Interprété par Robbie Williams.**

You alright, star  
No star  
You alright, star  
No star  
You alright, star  
No star  
I don't feel proper

I went to the doctor  
To get a prescription  
I told him little fact  
And lots of fiction  
About a bad back that I ain't got  
He tried to sell me faith healing  
But I think not  
I want Xanax, Vicadin and Oxycontin  
Funky fill the form out  
So I can drop 'em  
I've got all these demons  
And I can't stop 'em  
To tell you the truth Doc  
I might have a problem

Robert Williams take one Adderall  
With water in the morning  
As if I'm goin' to take one tablet  
I'm Keith Moon, dickhead

He said this one's to take you up  
(waoh)  
He said this one's to take you down  
(waoh)  
When I take um I don't feel sound  
And I look rather round

You alright, star  
No star  
You alright, star  
No star  
You alright, star  
Five star  
I don't feel proper

You know what Doc,  
It's alright and all  
I just heart me leg, it's not terminal  
But a pain killer could help

## Good doctor - 2/3

For what's wrong with my knee  
And I'm a little bit down  
From too much tea  
Got me own collection,  
Can't get an erection  
If I take 'em too long  
They'll fuck me complexion

That's right if I take em for  
Like more than a few days in  
A row I get that haunted look

Give me loads of pills

He said this one's to take you up  
(waoh)  
He said this one's to take you down  
(waoh)  
When I take 'em I don't feel sound  
And I look rather round

You alright, star  
No star  
You alright, star  
No star  
You alright, star  
Five star  
I don't feel proper

Now if you go to the barber  
Shop long enough then you're  
Gonna get a hair cut  
And if go to the Doctor's regular,  
Then you gots to be a fuck up

Well I've got five or six if I'm at a loss  
Do I have a history of drug abuse,  
No I never tick that box  
And I now that one of two of you  
Are going to be really, really cross  
But the drugs don't work,  
Prescription pills are boss  
The glory days are gone and  
We've all stopped havin it  
No raves no more,  
Just bedside cabinets  
Sleepers are great  
But don't start dabbing it  
The world carries on spinning,

## Good doctor - 3/3

We're mad, innit

Take that, take that, innit

He said this one's to take you up

(waoh)

He said this one's to take you down

(waoh)

When I take um I don't feel sound

And I look rather round

You alright, star

No star

You alright, star

No star

You alright, star

Five star

I don't feel proper

Know what Doc,

It's not like I've been doing

Any research or anything

But if you can give me any of the

Following pills I'd be very, very

Graetful 'cause I feel poorly

So that's

Codeine

Morphine

Opium

Methadone

Menocrabedene

Hydroanoxycodine

Anolodene

Buprenopheine

Butrophenol

Adderall

Dorel

Work with me, antidepressants

But not St John's Wort

'Cause I can get that at Boots
