

When you're at a loss - 1/1

Interprété par Tokio Hotel.

Nobody left
Who really knows me
My world is breakin' down
And there is a happy end
Not supposed to cry 'bout you
I know immortal we are not
However you said once
When you're at a loss i'll be an angel
For you alone
And appear for you in ev'ry deep dark night
And then we will fly far away from here
We will never loose us again
Until you appear the first time
I imagine that from above you
Cry for me with the clouds
I wait an eternity for you
It's not so endless however
Because you have said once
When you're at a loss i'll be an angel
For you alone
And appear for you in ev'ry deep dark night
And then we will fly far away from here
We will never loose us again
Never loose again
Think just of me and you see
The angel who flies on your side
Think just of me and you see
The angel who flies on your side
When you're at a loss i'll be an angel
For you alone
And appear for you in ev'ry deep dark night
And then we will fly far away from here
We will never loose us again
When you're at a
When you're at a loss
You're when you're at a
When you're at a loss
