

Alone in the light - 1/1

Interprété par U2.

City street lights and I walked away
Don't leave me standing in the cold
Cigarette lights, feel my finger alight
I need to be alone

She can take you tonight
She can make you, that's alright
She can break you tonight
Don't misunderstand

Cigarette girls throw his head in a whirl
To be a superman
All of her girls, there must be a glimpse
I'm drinking all I can

We can take it tonight
We can make it, that's right
We can break it tonight
Don't misunderstand

The light
Alone in the light
Alone in the light
Alone in the light
In the city at night

She can take it tonight
She can make you, that's right
She can break you tonight
Don't misunderstand
Please take my hand

Alone in the light
Alone in the light
Alone in the light
In the city at night

We roam the streets in the morning light
We held our head in our hands

Alone in the light
Alone in the light
Alone in the light
In the city at night
