

Still can't get over you - 1/1

Interprété par Take That.

With my hand in my pocket
I wave us off goodbye
With the hand that once touched you
Dried your tears when you cried
Oh I must've loved you
I used to tell you all the time
Ten times a day and fifty times each night
Still I wait for your reply

I reach to feel your pillow
I move in close and close my eyes
But it's just the end of one more lonely dream
Just the end of one more lonely night

Even after all this time
Still can't get over you
Even after all this time
Still can't get over you
Still can't get over you

For a moment you were with me
For a moment you were mine
Then the darkness comes and takes you far away
Before I even said goodbye

Even after all this time
Still can't get over you
Even after all this time
Still can't get over you
Still can't get over you
